

Perfect Bound Hinge Score Adjustment

Perfect Bound Covers

Perfect bound covers will get a 1/4" hinge score to prevent the covers from tearing off at the backbone.

You will need to allow for the 1/4" hinge score when setting up your files for the Inside Front Cover, Inside Back Cover, the first page facing the Inside Front Cover and the last page facing the Inside Back Cover.

Setup the Covers as spreads. The backbone width will be determined by the page count and stock weight. The exact measurement will be furnished by your Customer Service Representative.

Setup the first page facing the IFC and the last page facing the IBC as single pages.
